

Mohamed Aziz Ben Hassine Temimi

Data Science & Artificial Intelligence Engineering Student

azizbenhssine7@gmail.com • +216 90 505 949 • Hammamet, Tunisia

Portfolio: aziztemimii.github.io • GitHub: github.com/aziztemimii • [LinkedIn](#)

Languages: Arabic (native) • French (fluent) • English (professional)

PROFILE

Data Science engineering student building intelligent systems end-to-end — from machine-learning models to NLP and AI agents, through to API deployment. Seeking a **final-year internship (PFE) abroad** in Data Science / AI, starting February 2027.

PROFESSIONAL EXPERIENCE

AI Engineer Intern — LinkedLevel multi-agent chatbot

Obeya IT | Jun 2026 – Aug 2026 | Tunisia

- Multi-agent architecture: a ReAct orchestrator (LlamaIndex) routing each query to a RAG agent (PostgreSQL + pgvector) or a Data agent (structured business data queried in natural language)
- FastAPI backend with a voice interface (speech-to-text / text-to-speech) and automatic report generation
- Secured with NVIDIA NeMo Guardrails (topic filtering, confidentiality) and multilingual support

Development Intern — E-Transfert

GTI | Jul 2025 – Aug 2025 | Tunisia

- Web application digitalizing the bank transfer process, on a microservices architecture (modularity, scalability, resilience)
- Client interface to initiate and track requests; reduced processing time versus the manual process

DATA SCIENCE PROJECTS

Breast Cancer Lesion Detection — Deep Learning & Reinforcement Learning — Team Project

2025 | PyTorch, CBAM CNN, PPO, OpenCV, Docker

- Computer-vision pipeline on DICOM mammograms (INbreast): preprocessing, breast-region segmentation (Otsu + morphology), a CBAM-attention CNN (64×64 patches, Focal Loss) and a PPO curiosity-driven RL agent exploring the tissue
- Evaluated with Precision, Recall, F1-score and Specificity; deployed as an HTTP API with Docker
- **My contribution:** the RL + CNN core (data preprocessing, CBAM CNN, PPO environment)

MediNote — Multi-agent medical report platform — Team Project (ESPRIT)

Feb 2026 – May 2026 | Multi-agent systems, NLP | VITAL

- Platform to analyze and score medical visit reports, on a multi-agent architecture over a role-aware, JWT-secured data API
- **My contribution:** the orchestrator agent (query routing), the data agent (querying structured business data) and the analysis agent (report-quality evaluation and insight extraction)

MLOps Pipeline — Modular ML lifecycle with CI/CD

2025 | scikit-learn, XGBoost, GitHub Actions | github.com/aziztemimii/aziz-temimi-mlops_project

- Pipeline split into independent stages: prepare, train, evaluate, save, load
- Three interchangeable classifiers (Random Forest, AdaBoost, XGBoost); model and scaler persisted together to avoid *train/serve skew*
- GitHub Actions CI running an end-to-end smoke test on every push

E-Trade — Bank transfer & import documentary-credit management

Feb 2024 – Jun 2024 | Bachelor's final-year project | GTI

- Automated documentary-credit processing
- Modeled and managed financial data (clients, operations, transactions)

TECHNICAL SKILLS

Machine Learning: Regression, classification, clustering, PCA, reinforcement learning, statistical modeling

Deep Learning & NLP: ANN, CNN, RNN / LSTM, Transformers, natural language processing

Generative AI: Multi-agent systems, RAG, LlamaIndex, ReAct agents, vector databases (pgvector), NeMo Guardrails

Data Engineering: SQL, data cleaning & preparation, missing-value handling, APIs, web scraping

Programming & Tools: Python (Pandas, NumPy, Scikit-learn), TensorFlow / PyTorch, FastAPI, Git, Docker, GitHub Actions

EDUCATION

Computer Science Engineering Degree — Data Science major

ESPRIT — Private Higher School of Engineering and Technology | 09/2024 – present | Tunis

Bachelor's Degree in Computer Science & Multimedia

ISAMM — Higher Institute of Multimedia Arts of Manouba | 09/2021 – 06/2024 | Manouba

Baccalaureate in Experimental Sciences

Lycée Privé Idéale | 09/2020 – 06/2021 | Nabeul
